FIELD OF THE INVENTION

**Please insert the following section heading at page 1, between lines 14 and 15, as follows:**

DISCUSSION OF THE BACKGROUND

**Please replace the paragraph beginning at page 1, line 15, with the following rewritten paragraph:**

Optical storage discs with information stored on one or both sides have come to be used for a variety of purposes, most notably in the music, games, video, and computer industry. Digital information is stored on the optical storage media in the form of pits arranged along circular, concentric tracks on one or on both sides of the disc. The track is typically read from the inside out, but may also be read ~~form~~ from outside in, as it is already used for some optical storage media.

**Please insert the following title at page 3 between lines 20 and 21, as follows:**

SUMMARY OF THE INVENTION

**Please delete the paragraph beginning at page 3, line 25, as follows:**

~~The method to produce a copy protected record carrier for digital data according to the present invention is defined in independent claim 1. Preferred embodiments thereof are defined in the dependent claims 2 to 11. A device to~~

~~produce a record carrier with copy protection according to the present invention is defined in independent claim 13 and a copy protective record carrier according to the present invention is defined in independent claim 14. A computer program product according to the present invention is defined in claim 12.~~

**Please delete the paragraph beginning at page 3, line 35, as follows:**

~~Independent claims 15 and 16 define methods to copy digital data stored on a record carrier with copy protection according to the present invention onto a recordable record carrier, i. e. an evasion of the copy protection system according to the present invention. A corresponding computer program product is defined in claim 17 and claim 18 defines a computer storage means storing thereon such a computer program product. Claims 19 and 20 define corresponding devices to copy digital data stored on a record carrier with copy protection according to the present invention onto a recordable record carrier.~~
